BRILL *Over three centuries of scholarly publishing*

Yearbook of International Disaster Law

Editors:

Giulio Bartolini, Dug Cubie, Marlies Hesselman and Jacqueline Peel

With Volume 1 already **available in print and online***, and Volume 2 forthcoming - the aim of the *Yearbook of International Disaster Law* is to foster the interest of academics and practitioners on legal and institutional issues relevant to all forms of natural, technological/human-made disasters, including rapid and slow onset events, but excluding armed conflicts or political/financial crises per se. The *Yearbook* primarily addresses the international law dimension of relevant topics, alongside important regional and national dimensions relevant for the further development of legal and policy initiatives. The *Yearbook* fills a current gap in international journals as there is no a specific hub devoted to this area of law notwithstanding the increasing academic interest towards such issues.

Each Volume includes an **Open Access** section: "**The International Disaster Law in Practice**", which is available in the online edition. Each volume also includes a general selection of articles, and an international and regional review of International Disaster Law in Practice, plus book reviews and bibliography.

Volume Two will feature a thematic section on "Disasters and...: Exploring New Areas of Research".

Volume One features a thematic section on the Draft Articles of the ILC on the "Protection of Persons in the Event of Disasters".

The *Yearbook* will be of interest to academics, practitioners, stakeholders and policy-makers on legal and institutional issues relevant to all forms of natural, technological and human-made hazards.

*The **online edition** is available as a journal subscription. An active subscription includes access to all published Volumes.
